## PAEDIATRICS SERIES

### Common Surgical Problems in Children

Wednesday 3<sup>rd</sup> July 2024

19.00 - 20.00

Chaired by Dr Mike Barker, GP CPD Lead for North Wales

#### Overview

Potential surgical problems in children occur frequently and often first present to the GP. It can be difficult to decide which conditions need prompt referral and which are safe to watch and wait and may actually resolve.

This webinar will consider the common surgical problems such as hernia, hydrocele, phimosis and many more. In particular, it will review initial evaluation, management and weighing up who and when to refer.

Participants will feel increased confidence and competence at dealing with these cases, and time will be allocated to answer any questions that may arise.

**Speaker:** Dr Louise Phillips, Consultant Paediatrician.

**Designed for:** GPs. Other allied medical professionals are very welcome to attend.

**Format:** A presentation followed by the opportunity to direct questions to the expert speaker during the webinar.

*This session will be recorded for quality improvement purposes, but you will be able to disable your camera during the session.*
