

LONG COVID WEBINAR

Wednesday 12 May 2021

19.30 – 21.00

Chaired by Dr Nimish Shah, GP CPD Lead for South Wales

Overview

This webinar is designed to meet the following learning objectives:

- What are the new terms chosen by NICE for “long COVID” and why were they chosen?
- How common is post COVID syndrome?
- What helpful information could primary care clinicians provide to their patients?
- Do you know the common symptoms and signs of post COVID syndrome?
- Learn about the impact these symptoms can have on a patient’s life.
- Be part of the discussion looking at potential pathophysiology of post COVID syndrome.
- We will discuss a range of investigations that can be helpful in the management of post COVID syndrome – be part of this dialogue.
- Do you know of other resources available to support your patients?
- How to investigate whether you have post COVID services in your area to refer to?

Join us for this webinar and find out more, as we take you through a patient journey.

Speakers:

Dr Waqaar Shah

Chair of the Expert Advisory Panel on the Management of Long-term Effects of COVID 19 at NICE. GP partner at Chatfield Healthcare in London, GP appraiser and GP trainer.

Dr Chris Price

GP and Head of Revalidation Support Unit, Health Education and Improvement Wales (HEIW)

Designed for: GPs and Pharmacists. Other allied healthcare professionals are very welcome to attend.

Format: A presentation and patient case study with the opportunity to address questions during the webinar to the expert speakers.
