

HOW TO MANAGE ABNORMAL LFTs

Wednesday 5 May 2021

13.00 - 14.00

Chaired by Dr Nicola Flower, GP CPD Lead for West Wales

Overview

Liver disease is one of the five most common causes of premature death in the UK and is the only major cause of death that is increasing in incidence annually. However, more than 90% of liver disease is preventable.

In this interactive webinar we will discuss the main causes of liver disease, how to recognise 'at risk' patients and how best to manage them particularly in relation to LFT monitoring.

Speaker: Dr Ian Rees, Consultant Gastroenterologist, Prince Philip Hospital, Hywel Dda UHB

Designed for: GPs. Other allied medical professionals are very welcome to attend.

Format: A presentation followed by the opportunity to direct questions to the expert speaker during the webinar.

To register for this webinar, please visit [Virtual Learning Events | CPD for General Practitioners \(heiw.wales\)](https://www.heiw.wales/virtual-learning-events/cpd-for-general-practitioners)

This session will be recorded for quality improvement purposes, but you will be able to disable your camera during the session.
